Experience

SEP 24 - PRESENT Thoughtworks / **Senior Application Developer**
- Led UI tech stack decisions, defining tools, configurations, and project structure.
- Led efforts to improve app startup speed and migrated the client UI library..
- Developed CI/CD workflows and ensured seamless deployments with Docker and Kubernetes.
- Maintained the UI repository, resolving pipeline, performance, and environment issues.
- Mentored teams, cleared blockers, and represented the team in cross-functional discussions.

SEP 21 - AUG 24 Thoughtworks / **Application Developer**
- Contributed to UI development, focusing on React, TypeScript, and Jest.
- Led integration efforts, including injecting React DOM into legacy Hybris-based UI.
- Defined frontend project structure and CI processes, ensuring smooth development and deployment.
- Collaborated closely with client teams, showcasing work and gathering feedback.
- Played a key role in onboarding new team members and providing technical guidance.

JUL 19 - SEP 21 Thoughtworks / **STEP Intern**

Completed a 2.5-year training program focused on web development, mastering foundational and advanced concepts across JavaScript, React, and Java. Contributed to a real-world application under senior mentorship while building strong problem-solving and collaboration skills.
